**One-day National Workshop on
E-Governance and its implications to Indian MSME segment
(24th August, 2018)**

Rationale

The National e-Governance Plan - NeGP is changing the way people access public services today in India. With this 'single-window' concept, one can access most public services closer to home at an affordable cost with more transparencies. A common digital service delivery infrastructure is being created in every State and Union Territory to ensure seamless and single-window delivery of public services to the common man. Whether it is about putting up an application for a passport or tracing the pension cheque, or it is about getting the name of a new company registered or quick processing of land records, now citizens can get all the information and many transactions done at the touch of the button anytime, anywhere.

With a growing emphasis on citizen-centricity in the delivery of public services the Department of Electronics and Information Technology (DeitY), Government of India has formed the National e-Governance Division (NeGD), National Informatics Centre (NIC) and National Institute of Smart Government (NISG) for assisting DIT in the Programme Management of NeGP, active promotion and implementation of ICT solutions in the government.
