One – Week Programme on Project Appraisal and Risk Analysis (26th–30th August, 2019)

RATIONALE

Project appraisal is a cost and benefits analysis of different aspects of proposed project with an objective to adjudge its viability. A project involves employment of scarce resources. An entrepreneur needs to appraise various alternative projects before allocating the scarce resources for the best project. For appraising a project, its economic, financial, technical market, managerial and social aspects are analyzed. The effects of a project appraisal are long reaching and have very definite long term effects because of the capital investment that is always required in any project. Financial institutions carry out project appraisal to assess its creditworthiness before extending finance to a project.

In this context, one week training programme will focus on the best tools to manage the project appraisal process; identifying, and comparing significant evaluation methodologies ranging from social and developmental policies through environmental and stakeholder factors to the key mechanisms of economic and financial assessment; and systematically exploring the principal risk factors and other key issues that need to be considered in managing the planning of major, long-term, high-value projects.

OBJECTIVES

This programme is designed to improve the quality of the appraisal process in the widest sense – demonstrating how the process of project and capital expenditure appraisal can be used to dramatically improve cost control and deliver as risk-free as possible expenditure.

At the end of this programme, the participants will be able to:

- Understand the economics of appraisal
- Be in control of their projects from the start
- Understand the economics of their projects – and devise the most appropriate model
- Carry out sensitivity analysis and identify risk
- Improve their methods of appraisal and approach
- Focus on the risk areas & take out risk and control costs before they over –run
